

SOUND4

PRESS RELEASE

31st December 2016, Lyon, France

SOUND4 regains its Independance to fully express its creativity!

We officially announced our alliance with the Telos Group at IBC 2013. We have then worked together in creating a new stand alone voice processor (Voco 8), and reciprocal technology exchanges have broadened our horizons.

In December 2015 we finally decided to stop the merging process with the American Group as our respective strategies are too divergent.

The story goes on, nice surprises are on the way...

The SOUND4 Team,

ABOUT SOUND4 (www.sound4.biz)

Backed by more than 29 years of experience in Broadcast audio processing, SOUND4 has developed a wide range of unique and acclaimed processing solutions that run in powerful PCIe cards. In 2010, SOUND4 launched the first multi-channel voice processor and also integrated the Livewire Audio IP standard. This product has already received two distinctions: The Innovation Trophy in Paris in 2010 and the Pick Hit Award during the NAB 2012 in Las Vegas. Popular SOUND4 STREAM x8 Webradio Processor, the first PCIe 8-channel processor and streaming encoder received a Cool Stuff Award at the 2012 NAB Las Vegas show. Also available is the first ULA playout card (AES67 / Livewire+) powered with an innovative 3D Matrix and Mix Engine. In 2015 SOUND4 launched two new FM/HD Processors: The big one is the SOUND4 IMPACT, it is a 6-band product that "kicks their ass" to biggest competitor's products! The second new FM/HD Product is the SOUND4 PULSE, it is a 3-Band processor which can be upgraded to IMPACT! Multifunction is the heart of SOUND4 Products: RDS, IP Codec, Internet Streaming, backup audio... All those products are also available in option for less investment than external boxes...
